

# TEST POINTS

"RC " make test points are used to measure pipeline temperature and pressure during commissioning and operating of cooling of heating systems.

## BENEFITS

- Reduce costing by reducing the number of pressure gauges or thermo meters installation.
- Eliminate the chances of variations in reading due to calibration differences among pressure gauges and thermometer.
- Economical product.
- High quality sealing bush made of Neoprene rubber gives temperature range of -15 C to 150 C and also increased pressure rated at PN20.

## SPECIFICATIONS

| ITEM                | DESCRIPTION                   |
|---------------------|-------------------------------|
| BODY M.O.C.         | BRASS IS:319 GRADE DCB-I      |
| TOP COVER M.O.C.    | NYLON MOLDED                  |
| SEALING BUSH        | NEOPRENE RUBBER               |
| WORKING TEMP. RANGE | -15°C TO 150°C                |
| WORKING PRESSURE    | 20 kg/cm <sup>2</sup>         |
| TEST PRESSURE       | 30 kg/cm <sup>2</sup>         |
| CONNECTION          | SCREWED END 1/4" BSP(M) (6MM) |
